October 9, 2012

Bacanal Guacari, 2012

Omar Chacon uses small droplets of acrylic paint to create pieces so vivid and colorful they look like they belong in a dream.

Each painting is comprised of small, technicolor ovals that come together to form abstract paintings, so textured that you can see every layer of paint that goes into the work.

If you're in New York and looking to escape the grey city for a bit, head into the **Thatcher Projects** at 539 W 23rd St. Chacon's newest exhibit, *Bacanales Tropicales*, will give you the colorful boost you need.
